

Interdisciplinary Thinking

Interdisciplinary teaching is fundamental in unleashing student potential and engaging them in finding solutions to real-world complex problems. Recent research has also shown that it is a core component in promoting a truly inclusive, diverse curriculum. By opening the possibilities for application of ideas from a range of disciplines, the likelihood of connecting with the full array of the students in the classroom is enhanced by interdisciplinary thinking.

What are the aims of the session?

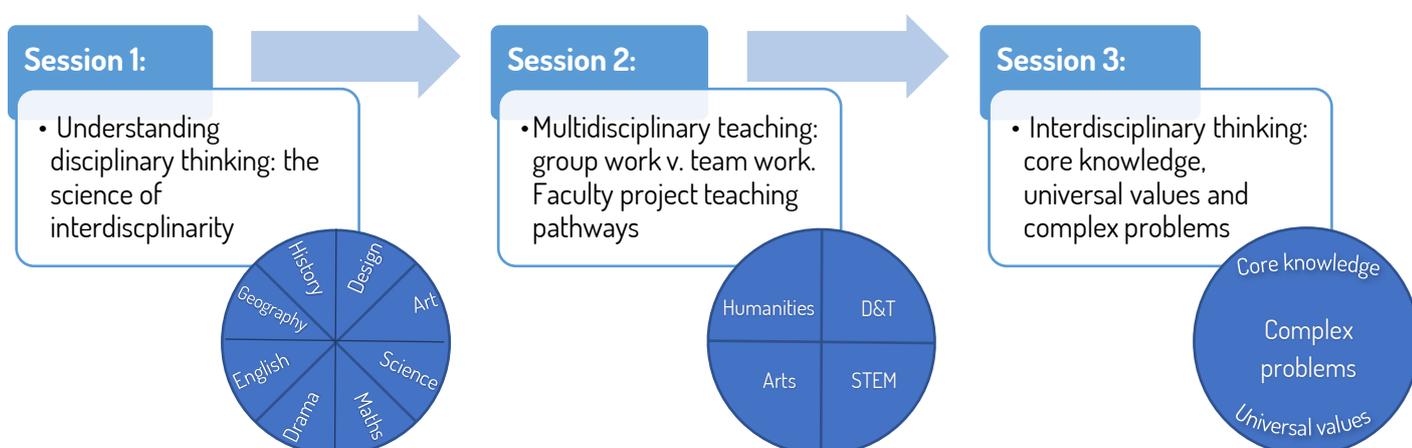

This training session will explore what we mean by 'disciplinary' and 'interdisciplinary' learning, providing a useful framework for teachers and curriculum leaders to map their journey towards an interdisciplinary curriculum.

What will we do in the session?

Through a series of interactive workshops, we will explore what constitutes interdisciplinary teaching and how to meet some of the institutional challenges presented when developing an interdisciplinary curriculum. From winning the support of your colleagues, navigating the complexities of collaboration between different disciplines and creating cohesiveness across modules, this session is intended to support you on your journey towards transformational curriculum change. Areas that the session will cover include:

- What we mean by disciplinary, multidisciplinary and interdisciplinary teaching
- Developing core knowledge and multiple knowledge streams
- Combining knowledge streams
- Delivering a relevant, responsive and research-led curriculum
- Interdisciplinary learning and assessment

What will the session look like?

Next steps...

Whether you're looking for full day INSET, half-day training or a twilight CPD session, I will be happy to develop training to meet the needs of your school or college. Get in touch to discuss your needs.
